

FOREX SECRET REPORT

**If you really want to make money,
spend 5 minutes and read this.**

Forex is the largest currency market in the world. It isn't located in any particular city or town. As a matter of fact it isn't located anywhere - it is entirely electronic. All you need to start investing money on Forex is ONE dollar and access to the Internet. These easy to fulfil requirements are the reason why millions of people invest their money on Forex every day. Among the investors are professional stock brokers, accountants, housewives, retired persons, students, engineers and stay-at-home mothers - literally anybody. There's no need for any specialised knowledge or skills to become a Forex trader.

» Is it simple?

Yes, **very simple**. What more - **it can't be any simpler**.

The Forex market users log in to their accounts via the Internet and, in the simplest case, they see in their browsers the following:

Of course there are more sophisticated tools such as charts and other available, but the basic case looks exactly as above.

Now, all you have to do to earn, is click one button (for example "Buy") and a moment later the other button ("Sell"). If the price of the chosen currency pair rises in meanwhile, you can earn even **400 times more** than the increase in the currency pair price.

This way, just at the effort of a few clicks a day, you can earn thousands or even hundred of thousand dollars per day.

» OK, where the catch?

Well, the crucial thing is to know which button to press. So far this all seems more like lottery than a method for a steady income. That's it. Many people feel that investing in Forex is more like gambling, and they don't treat it seriously. Actually the majority acts this way. Why? Because in order to make sensible investing decisions you have to know what you are doing. You need time and skills to figure out which button to press.

Most people don't have time and skills to achieve this, and therefore they lose money.

And ... 98% of Forex investors lose their money!

» What about the remaining 2%?

That's the point. **These 2% of investors get everything that the remaining 98% lose.** This means unimaginable amounts of money passing from hands to hands every day.

The 2% who get all the money **KNOW** what to do, because they **ALWAYS** use proper software that makes the decisions. Only machine, a powerful computer that analyzes all the data from the the market is able to make the right decision. Machines don't have emotions, they don't know what fear or greed means, and they never act according to intuition. They obtain the results by means of calculation, and this makes them the best advisers. That's why 98% of ordinary people lose their money to 2% of wise investors.

Some of the Forex gurus talk about automated Forex systems and they even sell these systems to other people. These systems are supposed to tell you whether to buy or sell. They draw charts, lines, and arrows. But unfortunately, they **DON'T WORK**.

These systems, delivered as ebooks or simple computer programs have one big disadvantage: they don't learn. And the market evolves daily and every new day requires a fresh, modified approach. Only supercomputers connected to the Internet 24 hour a day are have the power to analyze the markets in real time which enables them to correct their predictions dynamically.

That's why the **BEST** and **the ONLY working way** to earn money on Forex is by using **READY buy/sell signals** generated by highly specialized, intelligent, and self-improving software.

Forex Automoney, as one of the very few companies in the world, offers access to such signals. Take a look how it works:

After logging in to your account you see this:

Weekly Strategy Daily Strategy **Intraday Strategy**
